FLOORING

No-Adder Vendor 1391

Custom, Handmade-to-order Barnwood Flooring & Siding

We start with solid, rustic boards and utilize the natural surface as our platform to create the timeless look and tone of an antique board. The patina accurately replicates different surfaces you would come to expect in reclaimed materials.

Flooring

Hand selected White Oak is hand-planed and delivered with factory finished edges. Customized coloring: whether you are looking for the sun-bleached charm of a Connecticut home (Natural) or the unique history that a warehouse floor has to tell (Slate Grey), our flooring will satisfy your aesthetic tastes.

Designed to install as prefinished solid wood material, the boards are sealed and will age/change texture over time depending on the degree to which they are exposed to household elements. Naturally, this flooring requires little-to-no maintenance.

Available Colors:

Our standard size offering includes $\frac{3}{4}$ " thickness:

- Widths 5", 7" and 9"
- Random Lengths (4'-12')
- Hand scraped or circle sawn finish

Add-on accessories include:

- Edge and stair pieces
- Floor vents

Our Barnwood

Solid Rustic White Oak

Free of hazards – lead (paint) and arsenic (pesticide)

Standard dimensions minimize waste and cost

Color Consistency in large quantities

Low waste factor (approx. 10%)

Water-based, hand sprayed coloring requiring little to no maintenance

Contains natural non-toxic mold and mildew resistance

VS.

Reclaimed Barnwood

Commonly fir, pine or whatever wood was available at time of construction

Often contain contaminants considered dangerous by modern safety standards

Sourced in mis-matched and non-standard dimensions

Difficult to source uniform colors

Pre-existing lengths and dimensions – typically a 50% waste factor

May have artificial coatings that degrade over time and require continuous upkeep

Often purchased in state of decay, susceptible to further permanent damage

Siding

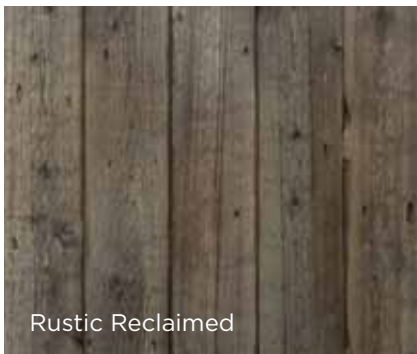

Created from Western Cedar, our barnwood siding is rustic in nature and not meant to be a common manufactured product. This product is unfinished and designed to age, react with the elements in the same manner as genuine reclaimed materials. The living finish is created with a non-toxic wood treatment that will darken when wet and lighten when dry. Offered in two grades – standard or distressed (contains natural cracks and nail holes).

Available Colors:

Standard Grade

Distressed Grade

All colors offered in packaged boxes:

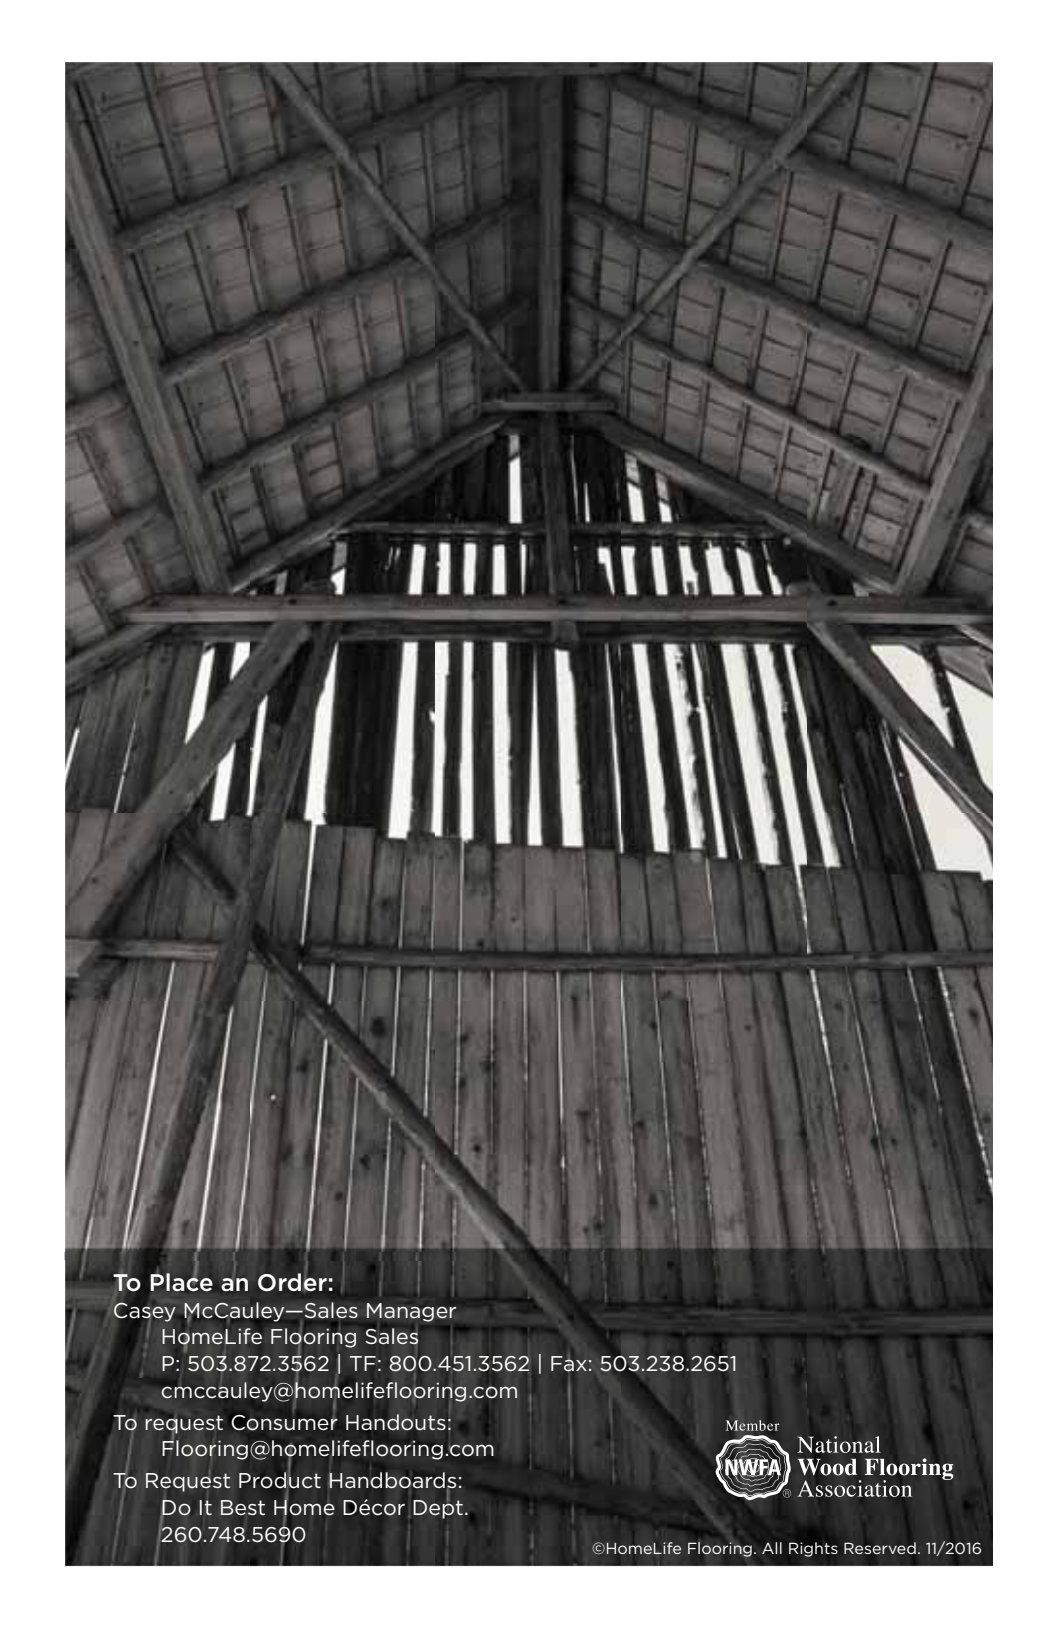

Finish: Standard or Distressed

Widths: 6" or 8"

Lengths: 4' or 8'

Mix and match boxes to create a custom pallet.
